TIEDEMANN PRODUCTS

*It feels good to know you've
made the right decision.*

In-house Research & Development

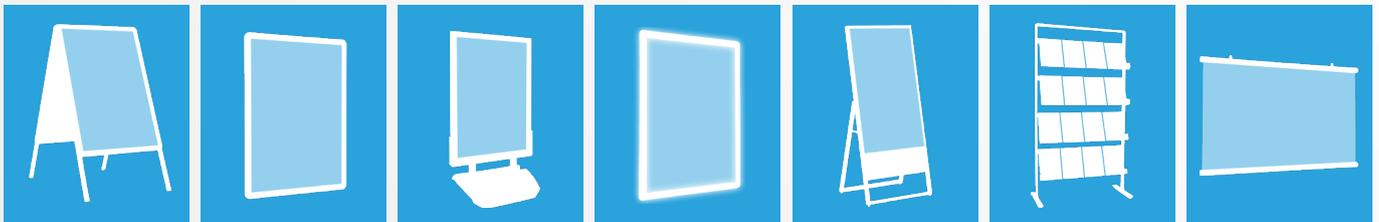

All planning and production takes place at our factory in Ebreichsdorf. Benefit from our experience and capabilities. At your request, we will gladly accompany you from the initial idea to the finished product. With state-of-the-art equipment, we can realize even complex one-off pieces and turn your ideas into reality.

Roof displays

Prestige Premium customer stopper

Designer aluminum roof display with two folding profiles for quick and easy poster replacement.

Interlocking hinges ensure first-class stability and break resistance – thanks to ergonomically shaped corner pieces, the frame has no sharp corners

Integrated rubber seals in the folding profiles with unique profile locking.

Large-area water drainage across the entire width for optimum protection in rain and snow.

Logo insert

Whether through a logo insert or printable logo plate – the ideal space for your company name or additional advertising messages. Stay flexible with the original Prestige Outdoor customer stopper!

Logo plate

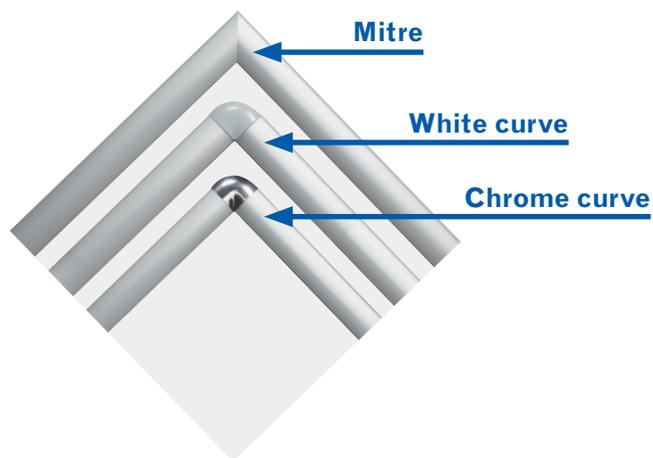

The premium customer stopper for tough outdoor use – quick poster change thanks to the **Twin Snap system** (only 2 profiles to open).

Thanks to the UV-resistant and anti-reflective poster protection screen with fold-over edge, the poster is excellently protected from the weather. As an innovation leader, we are the driving force in international poster frame technology. Over 50 years of experience have sharpened our sense for practical and technological progress.

Roof display

Classic customer stopper

The universal display stand – aluminum customer stopper with 25 mm or 33 mm profile. The frame looks more compact and we have also improved its functionality! Four folding profiles make it easy and convenient to change posters. The thermally stable rear panel largely prevents condensation from forming.

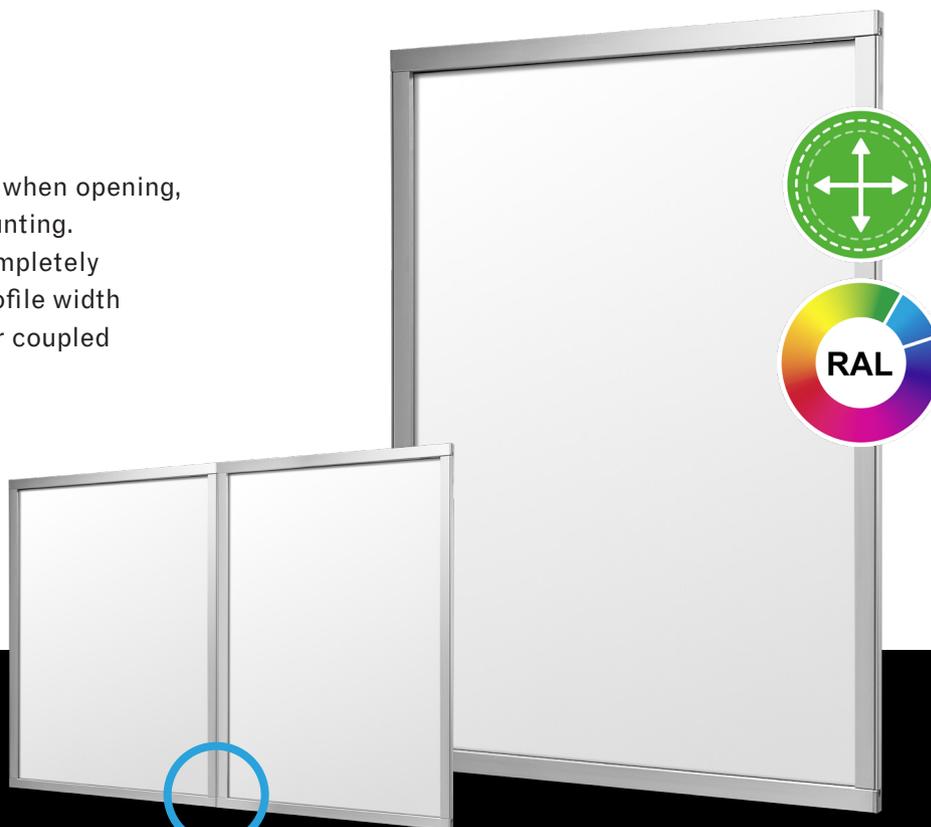

Roof display Slimline

Compact – better – more attractive

Designed without lateral displacement when opening, the frame is ideal for edge-to-edge mounting.

This versatile Slimline frame offers completely new possibilities for use. Its narrow profile width and shallow depth also make it ideal for coupled applications

The wide variety of Poster frames

We haven't reinvented the snap frame, but we have eliminated its well-known weaknesses. The result is high-quality products directly from the manufacturer. All snap frames, customer stoppers, roof displays, and Jetmasters are equipped with our profile security system. In addition, they feature a large-area water drainage system, a thermostable rear panel, and a weather protection film for durable outdoor use—without compromising on quick and easy poster replacement.

Prestige

Weatherproof aluminum snap frame with **TwinSnap® profile** for quick and easy poster replacement. New, rounded design—no sharp edges. With products from Tiedemann, you are always one step ahead.

Integrated rubber seals in the hinge profiles and a large-area water drainage system offer optimal protection against rain and snow. The weather protection film with fold-over edge provides additional protection against waterlogging.

Classic snap frame

Classic - with patented hinged strip profile securing system!

The aluminum snap frame with a new 33 mm profile. The frame looks more compact and we have also improved its functionality: four snap profiles make changing posters as easy as ever. The redesigned profiles offer better clamping action and form a seamless line with the corner pieces.

The insertion format is tailored to the poster format with millimeter precision and ensures an ideal fit—slipping or crooked posters are a thing of the past! The thermostable back panel ensures temperature equalization between the mounting wall and the poster surface, thus largely preventing condensation.

Poster formats

Profile in 33 mm with miter or rounding

- ✓ DIN formats:
A5, A4, A3, A2, A1, A0
- ✓ 500x700mm
- ✓ 700x1000mm
- ✓ **Special formats on request**

Jetmaster

Premium customer stopper

The aluminum Jetmaster for stable outdoor use and quick poster changes with the **Twin-Snap system** – just open up the two profiles, insert the poster into the poster pocket, and close it again. Done!

The Jetmaster gets its high stability from the designer base, which can be filled with water or sand. It is mounted on casters and can be easily moved by tilting it. The timeless design of the display is particularly appealing and has no sharp edges. The frame is equipped with rubber seals to effectively keep moisture away from the posters.

**A comparison will
convince you - there is
no better one!**

Different containers with different filling volumes are used depending on the type and size of the frame, ensuring a secure stand in all weather conditions. The included UV-resistant poster protection screen with flap provides additional protection against splashing water.

Special formats
bis 2000 x 3000mm

Jumbo-Base
160 Lit. | Pallet truck

1189x1750mm

Maxi-Base
60 Lit. | Casters

841 x 1198mm

Midi-Base
45 Lit. | Casters

594 x 841mm

Mini-Base
25 Lit. | Casters

We also manufacture special formats in special colors - entirely according to your specifications!

Jetmaster

With & without logo insert

Built for tough outdoor use – the most stable and robust display stand on the global market in professional quality!
The interchangeable logo insert offers space for your company name or additional advertising messages.

Formats

- ✓ DIN formats: A1, A0
- ✓ 500x700mm
- ✓ 1400x1000mm
- ✓ **Special formats on request**

Highly mobile – thanks to designer base with casters or pallet truck

Jetmaster JUMBO

JUMBO – the oversized display stand with a large base, 45 mm profile, extra-strong springs, and a large, sturdy bracket. A pallet truck is required to place it in the desired location – but thanks to its smart design, this is easy to do! The spring technology is tailored to the size of the frame. The Mini, Midi, and MaxiBase can be easily moved on casters without any additional tools.

Well-thought-out details and sturdy construction guarantee long-lasting quality.

Formats

- ✓ 1189x1682mm
- ✓ 1189x1750mm
- ✓ 1200x1800mm
- ✓ **Special formats up to 2000x3000mm on request**

LED-Surface lighting

Our LED panel lights are extremely versatile. Their slim design makes them easy to integrate into furniture – for example, in table tops, cabinet lighting, or kitchen splashbacks. They also offer numerous applications in shopfitting, such as illuminated shelves or display case lighting.

Clip-on frames

LED-Snap frames

Extremely narrow light frame (19 mm depth) – changing posters is as easy as ever thanks to the snap frame technology. The lighting impresses with its use of extremely bright, innovative LED lamps that provide particularly powerful and uniform light.

At the same time, power consumption has been further reduced. Each diffuser is individually laser-cut to the desired final format.

LED-Snapframe

Extremely narrow light frame (19 mm depth) – changing posters is as easy as ever thanks to the hinged frame technology. Each diffuser is individually laser-cut to the desired final format.

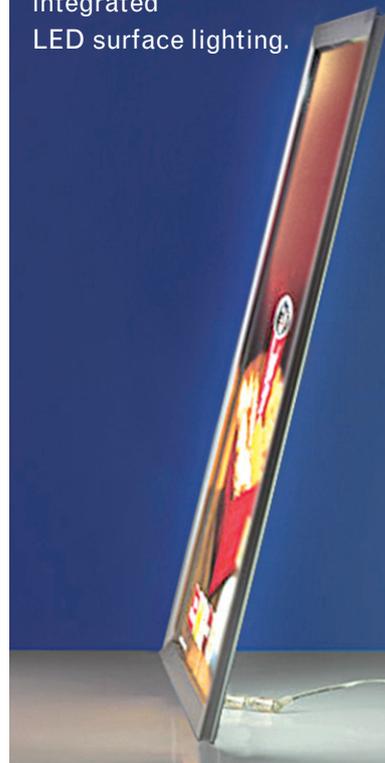

Details

Good to know!

- ✓ Special formats up to 2000 x 6000 mm
- ✓ 12V / 24V
- ✓ Indoor & outdoor use
- ✓ Minimal installation depth
- ✓ Low power consumption
- ✓ Easy poster replacement
- ✓ IP 65 water jet resistant for outdoor use

Proven snap frame technology with integrated LED surface lighting.

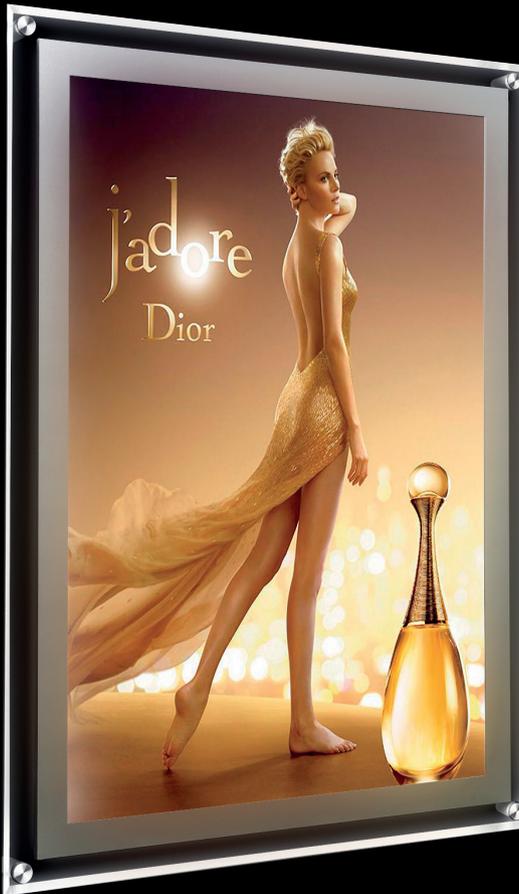

We manufacture profiles and formats according to your specifications!

Clip-on frames

LED-Crystalframe

Designer LED light frames for special advertising displays. The LED acrylic frame not only puts your advertising message in the right light, but also immediately catches the eye with its unique edge lighting. The posters are attached to the frame with a passe-partout film with magnetic strips and evenly illuminated by high-quality LEDs.

Designer technology with integrated LED surface lighting, transparent frame, and extremely flat construction depth.

- Architectural design
- Transparent cabling possible
- Exclusive wall and ceiling suspension
- Circumferential edge lighting

**Unique products for
unique customers.
„Unique like you“**

Magnetic frame technology with integrated LED panel lighting. Passe-partout pane with all-round magnetic technology for particularly easy motif changes.

Frame with extremely flat construction depth

Single and double-sided motif presentation for wall and hanging systems

Free-standing light columns

Design and formats according to your specifications (up to 6000 x 2000 mm)

Clip-on frames

LED-Magnetic frames

Innovative aluminum profile with special heat dissipation and its own screw channel – no drilling through the flat light panel required!

The energy-saving surface light panel is inserted into the frame system as a back panel and serves as a homogeneous light source. A poster protection film with a surrounding passe-partout is attached to the frame profile with magnetic strips and can be easily removed to change the poster.

Full-HD-LCD-Display **DIGIUP**-stand

The DIGIUP stand is a versatile customer stopper with a Full HD LCD display and integrated media player that can be used in a variety of environments:

- ✔ **Shop windows** – eye-catching advertising space to attract passers-by and promote products
- ✔ **Retail stores** - highlights special offers and new products to increase sales
- ✔ **Restaurants** - as a digital menu to display daily changing dishes or promotions
- ✔ **Events and trade fairs**

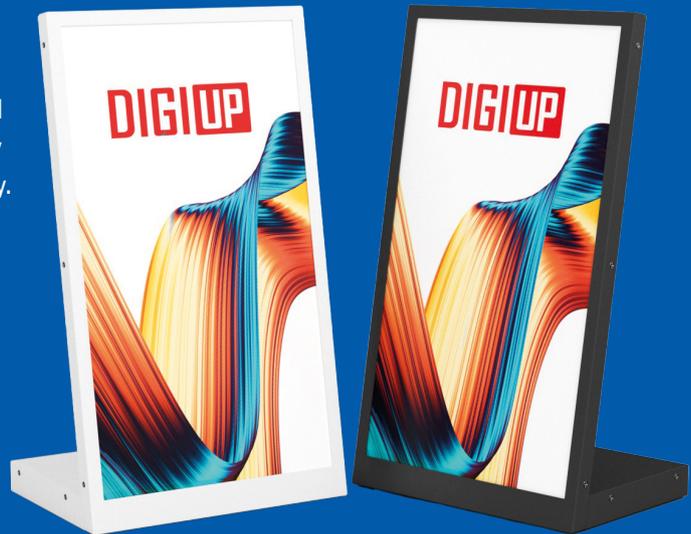

Full-HD-LCD Display **DIGIUP**-stand

With its slim, patented metal housing, the DIGIUP stand is lightweight yet sturdy, making it mobile and versatile. Content can be transferred to the device either via a USB stick or online using a content management system. Regardless of the transfer method, the content is always stored directly on the device.
DIGIUP stand – dimensions: 573 × 1320 × 460 mm

DIGIUP-desk

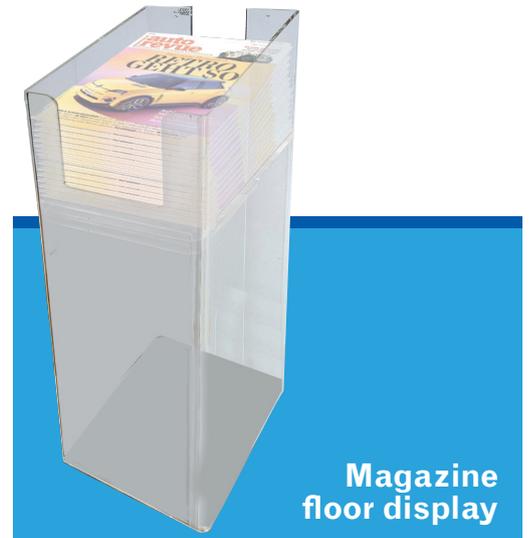

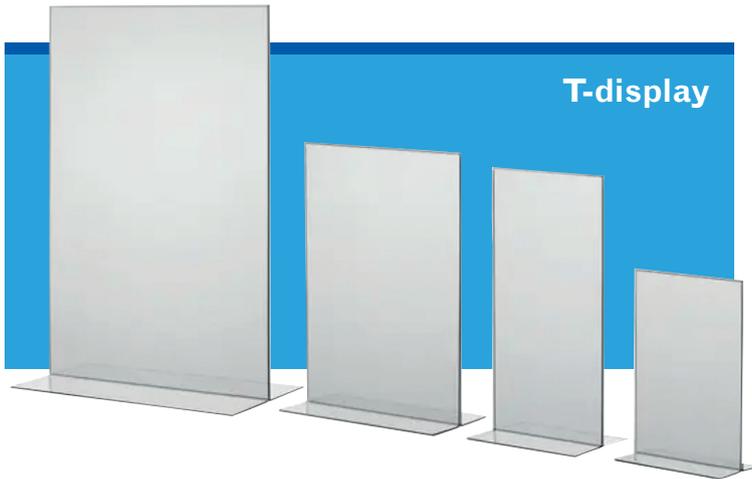

The digital L-shaped desk display. It plays videos and images in a loop. The DIGIUP DESK is delivered fully assembled and can be put into operation immediately. The display is fully automated and loaded with the desired software.

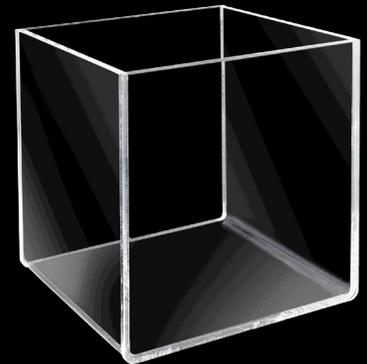

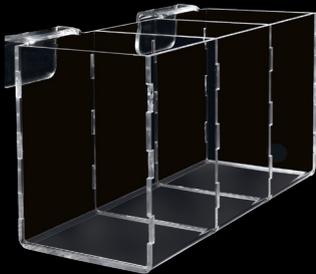

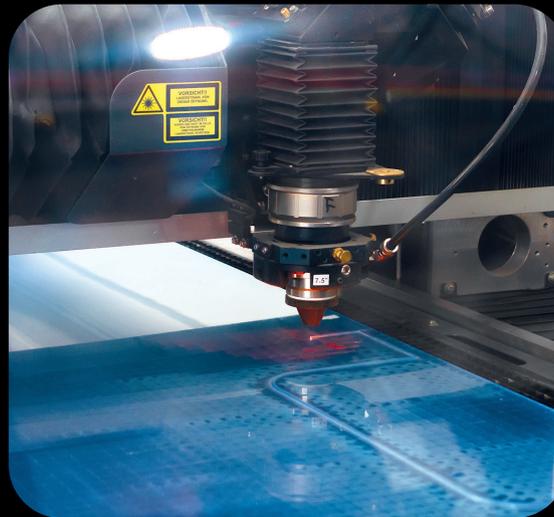

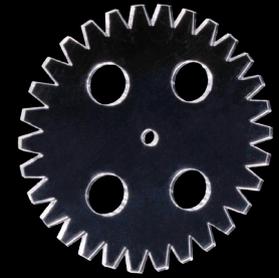

Laser cutting | Bending | Milling

Acrylic

Protect or display your models and valuables reliably by effectively shielding them from dust, dirt, and other external influences while showcasing them in an appealing way.

ACRYLIC

Information

Brochure stands & poster rails

Present your advertising message with our custom-designed brochure stands and poster rails. Whether in combination with snap frames or as floor or table displays – you determine the number and format of the brochures to be presented, and we will take care of implementing your idea. Poster rails in various designs are easy to install and flexible to use.

Information Display cases

Display cases are the ideal presentation space for notices in public areas, e.g., in schools, train stations, municipalities, or airports. However, they are also used in restaurants and hotels. We offer many different versions, both for indoor and outdoor use. Whether as a wall model or a column for setting in concrete, our display cases reliably protect your notices from unauthorized access. Also available with lighting!

Quality since 1974

Quality since 1974 – For us, the journey to perfection never ends!

As an Austrian manufacturer of successful point-of-sale products, we can draw on many years of experience in product development and comprehensive expertise in consulting. We bring these qualities to bear in our collaboration with our customers, making your success our mission. We offer high-quality products and services from a single source.

Innovation | Creativity | Quality | Reliability

These are the core values of our company, which we act upon with commitment in order to fulfill our customers' wishes. Our aim is to implement tailor-made solutions for your sales success as professionals at the point of sale.

Our experience is your advantage

Through ongoing collaboration with our customers, we develop sophisticated details that set our products apart and provide the ideal backdrop for your advertising. Many of these patented solutions guarantee uniqueness, robustness, and functionality. As a full-service provider with our own development and production facilities, we always have an eye for what is feasible.
